PERSONAL PROJECTS

Project 1: Call Center Voice Clustering.
(05/2020 - 06/2021)
- The aim of these Projects was that Currently, call center agents to interact with customers and try to facilitate and fulfill the customer needs. As part of the solution, We had Classified the customer conversations into different categories of calls linked with the automotive industry (i.e., new vehicle purchase inquiries, test drive requests, breakdown assistance, roadside assistance, etc.) for necessary action by the business.
- •This was the problem statement given by TCS in their hackathon.

Project 2: Cloud Computing - Cryptography.
(04/2019 - 04/2020)
- The aim of the project was Distributed access control of data stored in the cloud so that only authorized users with valid attributes can access them. The identity of the user is protected from the cloud during authentication. Access control and Authentication are both collision-resistant, meaning that no two users can access data or authenticate themselves.

CERTIFICATES

TECHFEST 2017 (02/2017 - Present)

Data Hiding in Cloud Computing(NEXUS 2017) (03/2017 - Present)

Ethical Hacking(TECHTONIC 2016). (04/2016 - Present)

IIT Spoken Tutorial Certification for complete training in C, C++, PHP, MySql, Python. (08/2019 - Present)

ACHIEVEMENTS

Participated in TECHNOTIC-2016 held at Sinhgad Institute of Technology, Lonavala.

Participated in TECHFEST-2017 held at Nutan Maharashtra Vidya Polytechnic.

Participated in NEXUS-2017 held at PDEA College Of Engineering.
